

Call for the second Antimilitarist Camp in Sardinia from the 6th to the 10th of October

The Network «No Basi né Qui né Altrove» («No Bases nor Here nor Elsewhere») launches, also this year, five days of mobilization and camp from the 6th to the 10th of October. These action days aim to strengthen the paths of the struggle against militarism and militarization of Sardinia and more. During the same days, there will be the beginning of the period of military trainings in the island.

In this moment, the link between the aerial base of Decimomannu and the shooting range of Capo Frasca might become the weakest point of the military presence in Sardinia. The crisis triggered by the leaving of the German aeronautics at the end of 2016 might affect the existence of the military airport and, therefore, of the shooting range of Capo Frasca.

For these reasons we want to create an environment always more hostile towards the soldier, with the purpose of preventing the arrival of new renters (eventually replacing the Germans).

During the last two years there have been several demonstrations and actions around the Decimomannu area aiming to block the military activity. For instance, the demonstration of the 11th of June 2015 succeeded in blocking the STAREX military training. These pressures gave some results: few days later, the military chiefs claimed that “there are not the conditions to operate with the needed serenity”.

We announce the camp in advance, so that it will be possible to create a path linked with the local communities. It will allow us to arrive at the beginning of October with ideas, projects and a participation as wide and aware as possible.

The camp does not want to be just an opinion event: we want alternate moments of struggle, sociality, analysis, debate, presence in the local communities and so on. It is Important to have moments of exchange, in which it is possible to think about perspectives and experiences, as well as to account how the struggles have developed, modified and extended.

The camp will be self-financed and self-organised. As usual, there will not be institutions and parties. Who is part of them can participate in the camp as an individual.

The program is currently under development.

We would like to discuss about the branches of the military system and how to hit them. During the last period, our activity mainly focused on: the connection between civil and military in the field of logistic and university research, the opposition to the RWM Italia spa (bomb factory of Domusnovas), and in general finding effective solutions in creating an unwelcoming environment to the military machine.

Differently from the last year camp in Cagliari, this year we decided to move the attention to the area where the military trainings mainly take place, in order to deepen the knowledge about those places and to strengthen the relations between people.

In this moment we believe that it is important to come back to Capo Frasca, in front of those fences where, the 13th of September, the sardinian antimilitarism re-entered in a phase of struggle.

The assemblies of the Network «No Basi né Qui né Altrove» are public, with a weekly basis and widespread in different areas of Sardinia.

On the blog nobasi.noblogs.org the program, the informations about the camp and the contacts will be available.
